

Tiny Tots/Summerfield Times 6th Edition

Summerfield
International School

Editor's Note

For decades, Tiny Tots/Summerfield has been striving to provide quality education that goes beyond the textbook and the classroom. This has allowed many of our students to achieve immeasurable personal and professional successes over the years. Our unfettered commitment to our mission has brought us far, but as we approach our Golden Jubilee, it is time for us to raise the bar. It is time for us to evolve.

It brings me great joy to state that this evolution process has already begun. Our students, teachers, and the administration have some incredibly innovative initiatives to share. A new and well equipped campus complete with all the sciences and IT labs, a virtual library, a performance space and a recreation room adds to the all-round education atmosphere. Our campus is now registered with the British Council as an official

Cambridge and Edexcel examinations center, so our students can take all of their exams from the same venue.

These are just some of the advancements among many that we've taken on this year, and I encourage every person directly or otherwise connected with the school to get involved in this evolutionary process.

With best wishes,

- Abraham Junaid

Raising Donations for

Flood Victims

As soon as the news of extensive flooding in the northern districts of Bangladesh reached us, our students were among the first to provide relief aid. Posters and slogans were made to raise awareness, funds and donations. The students utilized all their free classes and even stayed after school to compile and sort through an inventory of clothes, dry food, basic medicine, stationery and bedding. We thank Palok Foundation for their help with the logistics including transport to the relief areas to distribute the packages to those in need.

Introducing the Summerfield Student Council

Summerfield presents one of the first student leadership initiatives in Bangladesh: the Student Council. Students are provided a platform to take charge and serve the community, and in the process develop dynamic leadership and decision-making skills.

Lending a Helping Hand

Community Service Club

Our senior students and teachers regularly volunteer to teach at a government primary school in Bosilla, where they conduct classes for children from poorer socio-economic backgrounds.

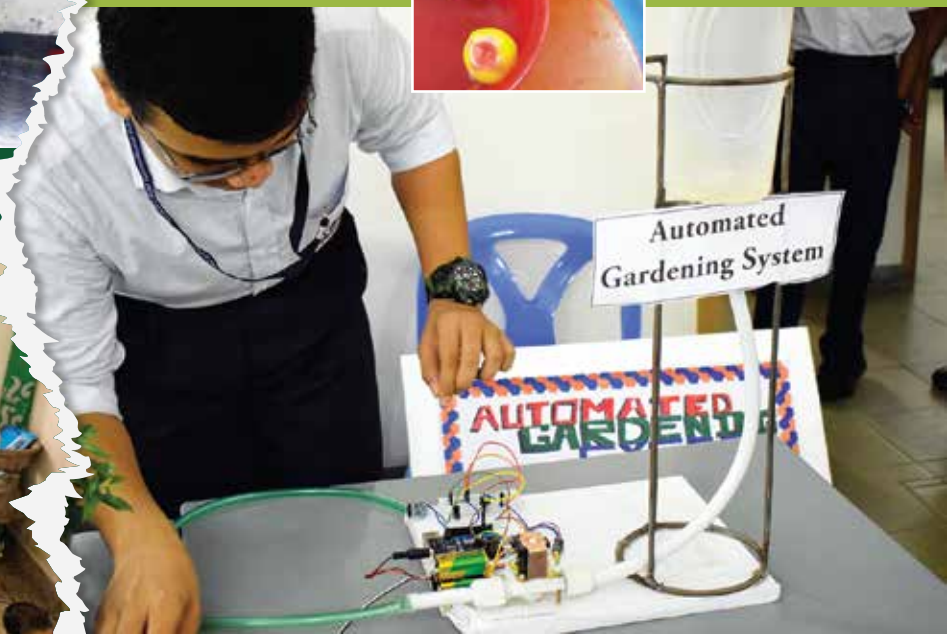

Visiting the "Hope for destitute women" daycare centre

Science Fun

Science is all about exploration and discovery, so there's no better way to get young scientists excited about learning than with hands-on activities and science experiments.

বাংলাদেশ ফিজিক্স অলিম্পিয়াড ২০১৮

ঢাকা অঞ্চল

৬ জানুয়ারি ২০১৮

Physics Olympiad

Duke of Edinburgh

Our students have been participating in this programme for the past five years. It is the worlds' leading youth achievement award, giving millions of 14- 24 year olds the opportunity to be the best they can be. A fun adventure and a wide range of activities offer endless possibilities.
